*Stress*

April 1984

St. Peter

**I**n the Gospel of Matthew, there is a very famous exhortation which reads, "Do not be anxious for tomorrow will be anxious for itself." In today's times, that is a good piece of advice to follow. We are indeed living in an age of anxiety; stress and the pressure of our daily lives can have a tremendous effect on us emotionally as well as physically. If we can learn to relax, we can begin to lessen, neutralize if you will, the effect that stress has on us. Learning to relax, then, is a key to the management of stress.

Stress can be defined as the body's reaction (physical, mental and chemical) to irritating, exciting, confusing or frightening situations. The cause of stress, or what is referred to as the stressor, or the stressful event, is, in and of itself, neutral. In other words, it is not the stressor but rather the reaction to it that can prove dysfunctional. The important point is how one deals with it as it is being internalized. Stress, if controlled, can be productive; to the extent that it controls the individual, it becomes counter-productive and indeed debilitating.

Hans Selye, a pioneer in the study of stress, makes an important distinction between distress and eustress. Distress is that which is counterproductive and debilitating, while eustress is positive and good stress. Selye contends that life without stress is death. It may well be that the quality of life is highest at moderate levels of stress, but we must learn to differentiate between acceptable stress levels (eustress) and too much stress (distress).

Some common symptoms of stress are insomnia, fatigue (if the fatigue is not as a result of extreme physical exertion), persistent headaches and/or backaches. Others include boredom, depression, listlessness, dullness and lack of interest if the individual finds him/herself unable to "snap-out" of one or a combination of these states.

---

Eating too much or too little can be additional symptoms of stress. In terms of the former, compulsive eating may well be an indication of the inability to deal with the stressor, while eating too little may indicate withdrawal from the stressor. Finally, and this list is by no means exhaustive, drinking too much may be a sign of inability to deal effectively with stress. Paranthetically, worrying about the symptoms may sometimes cause stress. Granted, most of us have experienced one or more of the symptoms at one time or another, but the important points to remember are *severity* and *persistence*. Examples such as persistent insomnia and severe headache and backache might be an indication that stress has taken control.

Kenneth Matheny, author and consultant on stress-related problems, suggests that many of us live mismanaged life-styles. We engage in high-risk behaviors (smoking, excessive drinking, over-eating). He contends that we make ourselves sick by what he calls "stupid living."

Research in stress management suggests that one should perform an analysis of one's life-style, a self-assessment, if you will, to see how one could engage in more productive, stress-reducing activities. This self-analysis may indicate the need to set some priorities since many of us may be attempting and expecting too much of ourselves.

Much of the stress that man experiences is created by himself; it is self-imposed. My own counseling experience with college students over the past 10 years, as well as what appears in the literature, indicates to me that many people may well spend more time ruminating, that is, worrying about what they should be doing than actually engaging in activities directed toward resolution.

We speak of task-relevant and task-irrelevant variables in the management of stress. The former, task-relevant variables, are those things which help to accomplish the task. The latter, the task-irrelevant variables, such as worry, perform in a dysfunctional manner, and interfere with and sometimes prevent task accomplishment. We need to sort out the difference between the two.

Dr. Roy Menninger, head of the Menninger Institute in Topeka, Kan., believes that as high as 70 percent of ailments, from backaches to insomnia, come about as a result of "the problems of living in modern America." He suggests that people exercise on a regular basis and take time to meditate each day as two techniques in dealing with excessive stress. When Juniata students come to me with stress-related concerns, I also suggest that they include some form

of exercise in their daily routine.

Karl Albrecht, author of *Stress and the Manager* (I highly recommend the book to all who desire to know more about the topic.), introduces the idea of Wellness Triad. It consists of three factors which are integral aspects of coping effectively with stress. The triad includes relaxation, exercise and diet (RED). All three contribute to the total health of an individual, thus increasing one's ability to deal with stress.

I would offer what I feel to be an effective way of dealing with stress that is so prevalent in our society. It is a very simple five-step approach to stress-management.

STEP 1. Do a self-analysis of your own lifestyle, trying to determine the source of stress for you. Make an attempt at minimizing those sources, and avoid, if you can, those situations that arouse, excite or otherwise irritate you.

STEP 2. Try to discriminate between those situations over which you have some control and those that you do not. We talked earlier about the worry component in stress management, that is, worrying more than doing.

STEP 3. Look for alternative activities such as a new hobby. Get involved in something different that will neutralize the stress. It is usually helpful and rewarding to look forward to something new and different.

STEP 4. Begin an exercise program. It is important to remember that for those over 35, consultation with your physician is vital. Walking, as an example, has been found to be as beneficial as jogging.

STEP 5. Learn to RELAX. There are numerous easy-to-learn relaxation exercises which can be self-administered when needed. In addition, there are many excellent books and numerous articles in the popular press that can help in learning to relax.

We do indeed live in an age of anxiety. We cannot totally eliminate stress, nor do we really want to. But we can learn to minimize it, and have it work for us and not against us.

*Editor's Note: Dr. Buchanan is Juniata's campus counselor and an assistant professor of psychology.*

## Vincent Price Visits J.C.

# "Villains Still Pursue Me"

By Robert C. Howden

He has made 110 films, performed on the Broadway and London stages and appeared in some 5,000 television shows. He even has a platinum record, with a little help from Michael Jackson.

When Vincent Price came to Juniata March 19-20, he did more than lecture to a packed Oller Hall. He went into classes and talked to students. "This type of program has been very popular, and I think I make an impact because no one else is doing it," says Price. He chastises other actors and musicians for not going out to talk to and encourage young people.

Price's lecture, "The Villains Still Pursue Me," had enormous audience appeal. It was serious yet light, colorful and often funny.

"It is a lecture that I have put together because I have found that there is a tremendous and enduring interest in villains. They seem to be much more popular than the heroes," Price says. He went on to talk about some of the "classic" villains and his association with villains through his films.

In classroom settings, Price discussed art history and drama. Price, who was an art historian before he became an actor, received his B.A. degree in art history from Yale University, and went on to study at the University of London and University of Vienna. He is the author of several books on art and cooking.

Price told the students, "My mission is to try to get people to make the effort to look at art. You can't just say, 'well here it is.'"

Shifting to acting, Price says, "If you really want it, you should take a crack at it. If you don't, you'll miss one of the most exciting adventures in life."

Looking back at Vincent Price's career confirms this assessment. He first appeared on the London stage, then made his Broadway debut opposite Helen Hayes in *Victoria Regina* in 1935. A film called *Service de Luxe* in 1938 launched his film career. He has gone on to appear in such classics as *The House of the Seven Gables*, *The Song of Bernadette*, *Laura*, *The Three Musketeers*, *His Kind of Woman* and *The Ten Commandments*.

Although Price may best be remembered for his horror movies, such films have not dominated his career. "Of the 110 movies I've made, only about 20 have been horror movies," Price says. Hollywood tends to put labels on individuals, whether or not they are justified, Price notes.

As for the new cult of horror films, Price says they are "too permissive and too violent and too bloody." He predicts they won't last because people have become bored with them.

Does Price have a favorite among his films? "There are films that you made that you enjoyed enormously making — you liked everyone, and

Actor Vincent Price delighted Juniata College audiences March 19-20 as he presented a series of lectures on villains, art history and acting. Large, enthusiastic crowds greeted Price throughout his stay.

it was fun and creative. Those films you never forget. They aren't always the best, but sometimes they are. And sometimes films that were agony to do turn out to be the best ones, or the worst ones," Price says. His two favorite films are the classic *Laura* and *The Eve of St. Mark*, a film about drafting young men during World War II.

Don't get the impression, however, that Vincent Price limits his talents to drama. "I love comedy. I've done about 5,000 television shows, and about 4,500 of them were comedy," he points out. Price has often appeared with such

comic geniuses as Red Skelton, Jack Benny and Milton Berle. "Some of the horror pictures were very funny too."

Price's latest venture was his participation in Michael Jackson's hit record album, *Thriller*. Price does a villainous reading on the song *Thriller*, the title track from the album.

It was Quincy Jones, the album's co-producer, who secured Price for the reading. "I was delighted to do it," Price says, and as a result has obtained some young fans.

Price explains that his lectures always draw a crowd because of the

popularity of his films. At a recent lecture, however, not everyone could get in because the popularity of the album brought out such a crowd. "I must have signed 300 or 400 copies of someone else's record, which is extraordinary," Price points out. "I have a platinum album, and that's kind of fun for a straight actor."

Vincent Price has distinguished himself in the fields of acting, art, literature and *haute cuisine*. He says one "must keep contemporary," and he has been doing just that for many years.

## Making a Room A Home

By Robert C. Howden

The typical college residence hall room is about 10 feet by 12 feet. The furnishings are plain, the walls sterile. It is a pretty dull place to spend nine months out of a year.

But all that changed at Juniata about four years ago. No, the college did not expand the size of the residence hall rooms. However, the administration did decide to give students a "free hand" at decorating their rooms to appeal to their individual tastes.

"We find that students adjust better and are better students when they can create their own environment," says John V. Linetty, assistant dean of student services and director of housing. Not only does Juniata encourage students to decorate their rooms, the Student Services Office has published the booklet *Your Room is Your Home*, which establishes decorating guidelines and provides instructions for painting, creating wall murals, constructing bunkbeds and lofts, and installing wall paneling.

"We tell students to think about the requirements for turning a dull residence hall room into a home.

Perhaps they will think about their room at home and incorporate some of those ideas into their room at Juniata. This concept gives the students some control over their own environment," Linetty says.

Since students spend a great deal of time in their rooms, they are urged to incorporate such essential ingredients as stimulation, control, order, privacy and freedom in developing their living environments. "The form that their room personalization project takes is limited only by their creativity, hard work and the few necessary guidelines the college has laid down," Linetty adds.

Since most students do not live in the same room all four years, room decorating guidelines are designed to protect future occupants. "We don't want students making changes that are permanent. Any construction projects must be dismantled at the end of the school year, and woodwork is not to be painted," Linetty notes.

Before students begin their decorating projects, they must complete painting and construction agreements that clearly describe the project. Those agreements must be

approved by the housing office before construction can begin. Once the project is completed, it is inspected by Linetty and the residence hall director to make sure all guidelines have been properly

Sharon Mayes '87 puts the finishing touches on a wall mural in one of the Leshner Hall corridors. Students are encouraged to decorate common living areas as well as their own rooms.

followed.

Halfway through the fall term each year, a room decoration contest is conducted in each residence hall. The winning room in each residence hall is selected by the members of the Residence Hall Association. Those rooms are then judged by Juniata President Dr. Frederick M. Binder, who awards a prize of \$50 to the best decorated room on campus.

Room decorating has become a serious "art" at Juniata. In addition to the interior designs that are created in the fall, individual rooms take on a special festival flare at Christmas. It is part of the holiday tradition tied in with Madrigal Dinner and Christmas open houses.

But the residence hall decorating concept goes beyond individual rooms. "We also try to encourage hall projects to decorate common living areas such as corridors and stairways," Linetty says.

This concept has also been successful, and it is not uncommon to see all the residents of a particular floor jointly decorating their hallways. Brightly colored

*Featuring numerous plants, two aquariums and a variety of colorful wall posters and furnishings, 407 Miller House was this year's first place winner in the annual Room Decorating Contest. Two of the room occupants are Paul G. Smith '86 of Exeter (left) and David R. Sloan '84 of Wayne.*

murals, geometric designs and popular cartoon characters like Ziggy and the Peanuts gang often grace the walls.

The various residence hall decorating projects have been a huge success, according to Linetty. By permitting students to design and create their own living environment, they have taken more pride in their rooms and living

areas. As a result, vandalism in the residence halls has decreased.

"The room decorating program has enabled students to regulate the variety and intensity of their living environment, as well as establish appropriate privacy levels," Linetty says. "All of these factors are important if the student is to feel at home away from home."

Juniata has received two major grants totaling \$15,000 for the \$1 million computerization project currently underway.

President Frederick M. Binder announced that a grant of \$10,000 to be paid over two years has been received from the Stackpole-Hall Foundation of St. Mary's, Pa. An additional gift of \$5,000 has been received from AMP, Inc. of Harrisburg.

"Juniata is very grateful to these two organizations for their generosity toward the college," Dr. Binder said. "The gifts indicate strong support for this computerization program, which is so important to Juniata's overall

## Computer Project Moves Forward

academic program."

A long-time Juniata supporter, the Stackpole-Hall Foundation was established in 1951 and provides support for religious, charitable, scientific, literary and educational purposes.

Founded in 1941, AMP, Inc. is one of the world's leading producers of electrical/electronic connection devices.

"This computerization program brings state-of-the-art equipment to Juniata and enhances a well-established program of higher education," Dr. Binder said. "Through their contributions, these organizations not only recognize that fact, but support it."

---

# Church-College Relations Council Meets

Financial aid opportunities and the recruitment of Church of the Brethren students were the focus of the most recent meeting of the Church-College Relations Council on Jan. 21. The council also instituted a plan for area communicators and church associates, who would serve as liaisons between the college and their respective congregations for student recruitment and other projects.

Lawrence Bock, director of financial aid, presented an overview of aid programs and procedures at Juniata, which underscored the fact that Brethren students, who come primarily from modest family backgrounds, tend to qualify for and require financial aid to attend the college. Compounding the problem is the fact that a far greater number of students are on aid at Juniata than at most other similar private institutions in the state, which places a greater strain on the available financial aid resources of the college. Bock emphasized that the financial aid support from the Church would be essential in providing increased educational opportunities for Brethren students in the years ahead.

To assist in the recruitment of Brethren students, the council announced plans to recruit Juniata alumni, parents of students, or other supporters to serve as "ambassadors" for Juniata to their respective congregations. Area communicators would coordinate the activities of church associates in their region, who would assist the college in identifying and helping to recruit qualified prospective students from their congregations. The program, which is designed to foster closer cooperation and communication between the college

and the Brethren community, has set as its first goal the recruitment of 10 Brethren students for the coming school year. Brethren students currently account for less than five percent of the total enrollment at Juniata. A training program for area communicators will be conducted at the council's fall meeting. The area and church structures are projected to be in place by this spring.

The council also announced the recipient of the annual church-college service award which is presented to a Juniata College alumnus who has served the church and college with distinction. The second annual award will be presented at the Juniata luncheon of the Annual Conference, beginning this year.

In other business, the council also proposed plans for a spiritual emphasis event in the fall. The event, which will probably take the form of a spiritual enrichment conference, is tentatively planned for Oct. 10-11.

## Planned Giving and You

By Ellen S. Wallace, Esq. '77

A gift to the Pooled Income Fund involves an exchange of cash or securities for an obligation of Juniata to pay an annual income to one or more beneficiaries for the duration of their lives. The cash or securities then become the absolute property of Juniata College.

The gift is valued as of the gift date to determine the fair market value, which is the number of units that the gift purchases in the fund. The income to the beneficiary is then based on the number of units in the fund.

The current yield on the Pooled Income Fund is approximately 10.5 percent, but it has been as high as 11.12 percent. The income which the beneficiary receives is then a combination of the unit share in the fund and the yield of the fund. This type of fund has a fluctuating return dependent on the market. The assets of the fund are the security behind the investment.

The donor who enters into a Pooled Income Fund agreement has several options in naming a beneficiary of the income. He can name himself, his spouse, a parent, a child or anyone else. The income

can be received either by one beneficiary, concurrently by two beneficiaries, or by a survivor beneficiary. The ages of the beneficiaries have no effect on the amount of the annual payment.

There are several other important advantages to an investment in the Pooled Income Fund. The fund is managed by experienced investors and invested in a diversified portfolio to provide security. If you prefer not to manage your funds any longer or if you have an inexperienced or incapable beneficiary, the Pooled Income Fund may have the answer for you.

There are also several income tax advantages of a Pooled Income Fund agreement. In the tax year that the gift is made, a sizeable charitable income tax deduction is allowed. The amount is determined by U.S. Treasury tables, which try to discount the life interest of the beneficiaries. The exact amount depends on the ages of the income beneficiaries and the recent yields of the Pooled Income Fund. The deduction is higher in the case of a single beneficiary than a two-life agreement, because the life expectancy of two people is longer than that of one person.

However, it must be remembered that when a gift of cash is made, the charitable deduction is limited to 50 percent of adjusted gross income in the gift year; there is also a five-year carry-forward for any unused deduction. If the gift is with appreciated securities, the ceiling is 30 percent with the same five-year carry-forward provision.

Another very important advantage of the Pooled Income Fund investment is the ability to fund the agreement with appreciated securities and avoid paying capital gains tax on the transfer. The fund takes over the donor's holding period. No capital gains taxes are paid by the fund on long-term gains, but the fund pays capital gains tax if the combined holding period is short-term. One is never subject to capital gains tax on a gift to the Pooled Income Fund.

There are also estate tax advantages of an investment in the Pooled Income Fund. If you make the gift and are the sole income beneficiary, the entire amount of the gift is removed from your taxable estate. If a husband and wife are both the donors and the income beneficiaries, the entire amount is removed from the taxable estate of both spouses. When the donor is the surviving beneficiary, there is no amount taxed to the donor's estate. When the donor is the first beneficiary to die, the life interest of the surviving income interest may be taxed depending on the size and complexity of the estate.

The income received from the Pooled Income Fund is taxed as ordinary dividend and interest income. Income is paid out quarterly to the income

beneficiaries. At the end of the fund's tax year, a written report is sent to each income beneficiary for their income tax.

Sample copies of the Pooled Income Fund agreement are available for your review. If you are contemplating a gift to our Pooled Income Fund and advise us of the birth date of the income beneficiary and the amount of the gift, we can compute the exact charitable deduction. We urge you, however, to discuss any contemplated gifts with your advisor and Juniata College.

If you have any questions, would like more information, or would like to make a gift to the Pooled Income Fund at Juniata College, please contact Ellen S. Wallace, Esq. Planned Giving Officer, at (814) 643-4310, ext. 210.

## *Juniata Concert Choir Completes Tours*

The annual winter tour of the Juniata Concert Choir this year took the group through Pennsylvania, Delaware, Maryland and Virginia, Feb. 26 to March 4.

Under the direction of Bruce A. Hirsch, associate professor of music, the 42-voice choir performed a variety of sacred and secular music by such composers as Handel, Luther-Mueller and Lotti during the six-concert tour.

Juniata choirs have been touring since 1920 when separate glee clubs for men and women completed their first tour. In 1932, the forerunner of the present Concert Choir, the A Cappella Choir, made its first tour. With the exception of three years during World War II, the Juniata choir has toured annually.

Always well received for its talent and enthusiasm, the Concert Choir has toured as far as Maine, Florida and Illinois. It has appeared on

*The Juniata College Concert Choir recently completed its annual winter tour, performing in Pennsylvania, Maryland, Delaware and Virginia.*

radio, television, in the Pennsylvania House of Representatives and at Harrisburg's William Penn Museum.

This year, the Concert Choir performed at the First Church of the Brethren in York, the New Goshenhoppen Reformed Church in East Greenville, the Siloam United Methodist Church in

Boothwyn, the Oakland Mills Uniting Church Meeting House in Columbia, Md., the Kenton United Methodist Church in Kenton, Del. and the Mount Vernon Church of the Brethren in Waynesboro, Va. The choir also visited Washington, D.C. before returning to Huntingdon.

---

# AROUND CAMPUS

---

## Board Members Accept Kudos

Three members of Juniata's Board of Trustees have been honored recently with employment promotions and special recognitions.

Vincent A. Sarni of Mount Lebanon has been named vice chairman of PPG Industries, Inc. and elected a director of the firm. Most recently, Sarni served as senior vice president at PPG.

A graduate of the University of Rhode Island, Sarni joined PPG in 1968 as vice president of marketing in the company's industrial chemical department. He received an honorary L.L.D. degree from Juniata in 1979 and served the college as foundation/corporate gifts chairman of the Sports + Recreation Center phase of the Century II Campaign. Sarni was named to

Juniata's Board in 1979. His son, Vincent A., Jr. is a 1978 Juniata graduate.

Elmer G. Grant, who for the last 12 years has served as chairman and president of Central Counties Bank in State College, has been selected to head the community banking department of Mellon National Corp. of Pittsburgh. CCB merged with Mellon Bank last year.

In his new position, Grant will oversee Mellon's 116 community offices in southwest Pennsylvania and the development of new products for individual customers and businesses.

A graduate of Allegheny College, Grant was named to the Juniata Board in 1982. He has lectured extensively and served as director of

the Pennsylvania Bankers School at Bucknell University.

Dr. W. Newton Long '40 was recently honored on the occasion of his semi-retirement as professor and vice chairman of the department of gynecology and obstetrics at the Emory University School of Medicine in Atlanta.

A Juniata trustee since 1976, Dr. Long was honored with the establishment of the W. Newton Long Lectureship Fund, which will sponsor an annual lecture in obstetrics and gynecology at Emory. The 17th Annual Resident Research Day Program of the department of gynecology and obstetrics was also dedicated in his honor.

## Darling Earns Ph.D.

Harriet E. Darling, assistant professor of education and director of the Early Childhood Education Center at Juniata, has been awarded a Ph.D. in human development from the Institute for Child Study/Department of Human Development at the University of Maryland.

Dr. Darling's dissertation, "The Relationship Between Gender Constancy and Piaget's Concept of Qualitative Identity," assessed how children between the ages of 3 and 5 relate gender constancy to an individual's appearance and changes in appearance. Constancy has been reached when a child can indicate that a person's gender stays the

same even if that person changes clothes or adopts actions usually associated with the opposite sex.

In her study of 98 children, Dr. Darling concluded that "children in the preoperational stage of development do exhibit gender constancy, and that the appearance of gender and non-gender identity constancy increases as the age of the preschool population increases."

A native of Mitchell, S. Dak., Dr. Darling received her B.S. and M.S. degrees from South Dakota State University. She is a specialist in child development and family relations, and has conducted several workshops and lectures on child development topics.

Prior to coming to Juniata in 1980, Dr. Darling was a family day care provider trainer with the Fairfax County (Va.) Office for Children. She also has taught at the University of Maryland and South Dakota State University.

# Memorial Scholarship Established

A scholarship memorializing the late Rev. Charles L. Cox has been established at Juniata College by his wife, Edith L. Cox of the Morrison's Cove Home, Martinsburg.

To be known as the Charles L. Cox Brethren Scholarship, the award will be presented annually at the Spring Convocation to a junior Brethren student who has participated in religious activities on campus and achieved academic excellence. The recipient will be selected by the campus minister, director of church relations and the college administration.

A 1905 Juniata graduate, Rev.

Cox was called to the ministry in 1913, and was the first minister at the Claysburg Church of the Brethren, serving from 1926-51. He was active in the Middle District, Church of the Brethren as well as

serving as a supply pastor. In addition to his work as a minister, Rev. Cox served as a postmaster, teacher and businessman in the Claysburg area.

# 2000 + Alumni Contacted

The Annual Support Fund concluded its recent phonathon campaign with over \$18,500 in pledges from Juniata College alumni. This year's phonathon attracted 32 alumni and 55 student volunteers, who contacted more than 2,000 alumni during the 16 evenings of the campaign, which ran from Jan. 23 through Feb. 15 in Shoemaker Galleries.

The phone campaign showed a few new wrinkles this year, as Annual Support Fund Director Russell Rupiper introduced dormitory competition as a means of increasing student volunteer participation. The competition emphasized the importance of new contributions and increased contributions, with one point awarded for each.

The final results showed Leshar Hall on top, closely followed by

# Parents Assoc. Meets

The Juniata Parents Association Council, under the direction of Kenneth and Phyllis Hoover of Lancaster, met March 4 to discuss a variety of upcoming projects and programs.

In an effort to assist with the fundraising campaign for the new academic and administrative computer systems, Council members agreed to contact parents of current students to enlist support. The Council emphasized that the project would mean a great deal toward the funding of the new computer system and supporting Juniata's educational quality.

Council members also turned their attention to the Career Planning and Placement Office and

members of the senior class who are trying to secure jobs. Several Council members supplied information on job opportunities available in their companies and took copies of the Placement Profiles booklet for distribution to various businesses and organizations.

Next year's Parents Weekend has been set for Oct. 27-28, and the Council discussed possible program ideas. An afternoon cruise on Raystown Lake, opportunities for tennis, golf, volleyball and other sporting events, a Saturday night film and a family-style breakfast Sunday were some of the ideas presented.

*Junior Richard W. Brosky of Armagh mans one of the telephones during the recent Annual Support Fund telephone campaign. Many students and alumni made calls during the campaign which Annual Support Fund Chairman Glenn E. Holsinger '47 called "a huge success."*

South Hall; Tussey/Terrace finished third. Students also competed for individual prizes awarded nightly to the callers with the best dollar and point totals.

The phonathon marked the beginning of the Annual Support Fund's final push toward its goals of \$225,000 and 43 per cent alumni participation for 1983-84. Although the class fund agent system, which has worked so well for Juniata over the years, remains the center of the Annual Support Fund effort, Rupiper sees an increasingly important role for the phone campaign as well.

"Phone campaigns are pretty much the state of the art in annual funds these days," said Rupiper. "They allow you to contact large numbers of alumni quickly and economically, of course, but they have two other major advantages

which are vital to building a strong annual giving program. Phonathons are an excellent communications device because they offer personalized, immediate, two-way communication between the college and individual alumni," he continued. "They give alumni a real opportunity to ask questions or say what's on their mind without going through the trouble of letter writing. For our part, the phone campaign allows us to approach each alumnus whom we call with the idea of getting non-givers or occasional givers to give regularly and getting regular donors to increase their contributions. Those are the two best ways of increasing annual support for the college, and phone campaigns are a proven method of accomplishing those strategies," he concluded.

Phonathon pledges to the Annual Support Fund are payable by June 30 of this year.

*State Senate Majority Leader Robert C. Jubelirer (left) welcomed President Frederick M. Binder to his March 22 seminar, "Under the Capitol Dome: A Student's Guide to State Government," where Dr. Binder delivered the keynote address. The seminar was attended by some 150 high school seniors from Central Pennsylvania who came to learn more about state government. In his address, Dr. Binder traced the history of the U.S. Constitution and urged the students to get involved at all levels of government.*

## FACULTY AND STAFF

The University of Pennsylvania recently invited J. PETER TREXLER, professor of geology, to give a lecture-seminar on "Geological Setting of the Anthracite Fields of Northeastern Pennsylvania." The presentation, which included discussions with Penn graduate students and faculty, was part of the Penn geology department's spring series of guest lectures.

DOUGLAS S. GLAZIER, assistant professor of biology, visited the University of Georgia's Savannah River Ecology Laboratory in December where he instigated a joint effort to test a theoretical idea concerning the population biology of white-tailed deer, using the extensive data collected over several years by the laboratory.

"Directions for the Church in the Second Half of the '80s" was the

topic of an address presented by M. ANDREW MURRAY, campus minister, to the national staff and district executives of the Church of the Brethren.

President FREDERICK M. BINDER, along with two other college administrators, has written a comprehensive report on the study tour he made of British universities in March, 1983. The report was prepared for the American Association of University Administrators and outlines university administration in Great Britain. Dr. Binder made the trip to Britain under a grant from the British Council.

JAMES R. DONALDSON '67, assistant professor of economics and business administration, has completed all the requirements for his M.B.A. degree at Syracuse University. Since May, 1981, he has

followed Syracuse's independent study degree program, the only such program fully accredited by the American Association of Collegiate Schools of Business.

Women's Health Services of Mifflin, Juniata and Huntingdon counties has named JULIA A. KEEHNER, assistant dean of student services for residential life, to its board of directors. In addition, Ms. Keehner was recently named to *Outstanding Young Women in America*.

THOMAS R. THOMPSON, instructor in economics and business administration, received an acknowledgement in the text *Strategy for Personal Finance*, (third edition) for his role in reviewing the manuscript. The book is being published by McGraw-Hill.

---

# STUDENTS

---

Two Juniata students, freshman DANIELLE M. RUPP of Red Lion and senior DANIEL S. WEYANDT of Duncansville, were among the 136 outstanding musicians selected to participate in the 37th annual Pennsylvania Intercollegiate Band Festival held March 8-10.

A total of 250 students from 31 Pennsylvania colleges and universities were nominated by their band directors to audition for the festival. The event was sponsored by the Pennsylvania Collegiate Bandmasters Association. Col. Arnald D. Gabriel, conductor of the United States Air Force Band, was guest conductor for the festival.

WKVR-FM, the campus radio station, has elected its new officers for 1984-85. DAVID A. PETERS, a sophomore from York, is the new station manager. Serving with him will be freshman SHELLY J. GUEST of Columbia, Md., program director; junior JOHN M. KIRCHGASSER, III of Media, business manager; sophomore

GREGORY S. MOLCHANY of Johnstown, chief engineer; sophomore ALAN L. SHEAFFER of Lewistown, chief announcer; and junior LINDA C. RAMSAY of Exton, news director. The new staff assumed its duties at the beginning of spring term.

Thirty Juniata students have been selected for the 1984 edition of *Who's Who Among Students in American Universities and Colleges*. Selection is based on academic achievement, service to the community, leadership in extracurricular activities and future potential.

The seniors named are: ROBERT E. ADAMEK of Pittsburgh, JAMES G. ADAMS of Altoona, LAURA A. BABIASH of Malvern, MARY LOU BEERS of Liberty, ROXANN L. BINNER of Dillsburg, KARYN L. CABLE of Clearwater, Fla., CHRISTOPHER D. COLLINS of Ebensburg, DAVID M. DEISHER of York, NANCY H. FIELDMAN of Baltimore, Md., BRIAN G.

FREDERICK of Williamsport, WILLIAM J. GRIMM of Tyrone, MARGARET A. GUERRINI of Middleburg, SHERRI L. HEROLD of Altoona, JAY E. JONES of Julian and KYLE R. KAULBACK of Toms River, N.J.

Also, GREGORY A. KIMBLE of Tyrone, JOHN R. LYNCH of Southampton, LORI A. MENGEL of Frackville, NICOLEE E. MENGEL of Tyrone, DAVID K. MERWINE of Harrisburg, GRADY L. PAUL of Hummelstown, BURDETT R. PORTER of Montoursville, JEFFREY R. RUSH of Cortland, N.Y., MICHAEL D. SACHAIS of Emerson, N.J., MARK J. SHAW of Norristown, STEVEN C. SILVERMAN of Reading, ELIZABETH A. WEADER of Selinsgrove and JOSEPH W. WHITACRE of York Springs.

Two juniors were also selected. They are: DEBORAH L. MAUE of Shamokin and SHARYN D. SIEHL of Johnstown.

---

# VISITORS

---

In its continuing effort to provide a forum for discussing current world issues, Juniata's Baker Lecture Series program has brought several prominent speakers to campus this year.

RODNEY W. JONES '64, senior fellow and director of nuclear policy studies at Georgetown University's Center for Strategic and International Studies, visited campus in January to discuss "Nuclear Proliferation and American Security." Dr. Jones is a

specialist in nuclear technology and weapons proliferation, and on security problems in the Third World.

February's lecture dealt with "The Debt Problem and the Future of the Developing Countries." The topic was discussed by SHAHID JAVED BURKI, director of the international relations department at the World Bank in Washington. Burki is a native of Pakistan where he served as economic advisor of the Ministry of Commerce.

The jazz sound of the Palmyra-based band THIRD STREAM filled Oller Hall in January. The group played the full spectrum of jazz, including Dixieland, swing, be-bop, avant-garde and fusion, and provided the audience with an exciting evening of entertainment. Third Stream has appeared throughout the East with such artists as Herbie Hancock, Tower of Power, Jeff Beck and Livingston Taylor.

# Maple Sugaring — Pennsylvania Style!

As Central Pennsylvania's cold winter nights give way to spring-like days, Juniata students flock to the Environmental Studies Field Station at Raystown Lake for the annual maple sugaring ritual.

For the last eight years, students and staff members have been tapping nearly 300 sugar-maple trees at the 365-acre Field Station, collecting the sugar water and boiling it into maple syrup.

The entire procedure, from tapping the trees to bottling the syrup, is done at the Field Station by the college volunteers. Dr. Robert L. Fisher, professor of biology and director of the Field Station, has been running the sugaring operation for the last eight years.

"Many of the students have no idea what sugaring is all about and they often come out of curiosity," Fisher says. "Once they have participated in the process, however, they usually come back again and again. It can be hard work at times, but it is also a lot of fun."

# SPORTS

## *Future Promising*

# Winter Sports Wrap-up

After winning only one of eight pre-Christmas contests, the men's basketball team recovered from their disappointing start to finish the season with an 8-17 record, including wins in four of their last eight games. Juniata finished 6-16 a year ago.

For Head Coach Dan Helm, in his third year, 1983-84 will be remembered as two totally different seasons rolled into one. "We were a very inconsistent basketball team in December," recalls Helm, "but we got better after our trip to Belgium at Christmas and seemed to become a little more consistent. We hit another down streak late in January, but then played solid in February, going 4-4 and beating Elizabethtown in their gym. It was another season where we started off slow, and by the time we were playing well, we ran out of games to play."

The Indians will lose three senior starters to graduation. The three were major contributors all season. Guard Dan Feruck of Pennsville, NJ, (Pennsville) a 1,000+ scorer, finished off his final year at Juniata with 362 points and a 14.4 average. Feruck's backcourt mate Paul Kardish of Churchville (Holy Ghost) averaged 6.8 a game and was the Tribe's second leading rebounder with a 4.8 average. Senior reserve John Weiner of Elkland (Elkland) will also be lost to graduation.

The Indian stat leader for the 83-84 season was junior Mark Rucinski. The 6-7 center from Olean, NY (Archbishop Walsh), was one of the premier small college centers in the East. Rucinski finished

with a 15.0 points-per-game scoring mark while he averaged 12.4 rebounds a contest. His 309 rebounds set a new Juniata single season record and assured him a top ten finish in the nation's Division III rankings. Next season, Rucinski will most likely become the first 1,000 point-1,000 rebound player in Juniata history.

The other Indian double figure scorer was sophomore Dick Moses of Philadelphia (Lower Moreland). The 6-4 forward averaged 11.3 points a game.

"As our statistics show," notes Helm, "we depended on our seniors quite a bit. But we did get some solid performances from some of our underclassmen."

"I can't help being optimistic about next year. We are going to have one of the nation's leading rebounders back in Rucinski plus a potentially great scorer in Moses, who shot 53 percent from the floor and didn't really start scoring much until later in the season. I think we have a lot to look forward to next year."

"Although we finished with

another losing record, we did improve late in the season and played very well against some good teams like Scranton, Cabrini and

*Juniata's leading scorer and leading rebounder, Mark Rucinski, will close the 1983-84 statistical book as one of the division's top ten rebounders in the nation.*

Elizabethtown. We need to recruit some key people for next year," Helm concluded, "especially at guard, and we hope to mesh everyone together for a solid team from top to bottom. We are hoping to take the improvement of our team this year and carry it right into the 1984-85 season."

## Women Close At 7-12

The Juniata women's basketball team suffered its share of knocks in the 83-84 season, closing out the campaign with a 7-12 record.

The final tally, however, does not accurately depict how good a team the JC women had, according to seventh-year head coach Nancy Latimore.

"The record shows that we lost

five games in February," Latimore said, "but unless you look closely, you won't see that our games with Kings (68-72), York (53-54) and Messiah (66-74) could have gone either way in the final minutes."

"We have a good, quick, aggressive team here, and we all are anxious and excited about the prospects for the future," she added.

The Indians will not lose any players from this year's squad to graduation.

"We need to recruit to improve our rebounding strength," Latimore said. "We are able to shoot with the best of them, but we just couldn't get the ball off the boards when we had to, so we'll be looking for some strength inside for next season."

Pacing the Indians in all categories this season was junior Patti Ryan. Ryan scored 333 points in the 83-84 campaign and led the team with 195 rebounds. Ryan's performance was good enough to earn her all-conference honors in the Northern Division, Northwest section.

Valuable contributions were made

Statistical leader Patti Ryan cans one of her 333 points.

by Holly Crable with 249 points, Carolyn Stambaugh with 155 tallies and Debbie Rahm who, at 5'6", hauled in 101 rebounds and added 105 points to the Indian effort. Junior Peggy Evans offered rebounding strength with 101 caroms and added 86 points.

Adding strength off the bench were Paula Hillegass, Karen Fonner, Alison Kellock and Laurie Nartatez who combined for 140 points and 106 rebounds.

In conclusion, Coach Latimore said, "We are playing in what amounts to the best Division III conference in the nation, and next season, if things go our way, we are going to be right in the thick of it."

## Grapplers End Season 6-8

Coach Bill Berrier's wrestling squad provided the Juniata wrestling fans with some exciting moments in the 1983-84 season. The grapplers closed the season at 6-8 in dual meets.

Leading the Tribe was junior co-captain Rick Noll. Wrestling at the 134 weight class, Noll posted a 16-4 dual meet record.

Noll began the season by finishing fourth in the highly competitive Lebanon Valley Invitational and posted a championship performance in January's Juniata Invitational. In post-season competition, Noll made it to the semi-final match at the MAC tournament before losing to Moravian's Robert Condryn.

"Rick has been a good, solid performer all season," said Coach Berrier. "We expect Rick to continue in the leadership role that he so ably handled this year."

Another top grappler for the Indians in 83-84 was senior co-captain Dave Sloan who wrestled at the 150 class. Sloan posted a 13-4-1 dual meet record. He added a first-round victory at the Lebanon Valley Invitational and took the 150 lb. championship in Juniata's second-

The men's basketball team paid a visit to the pediatrics unit of Huntingdon's J.C. Blair Memorial Hospital in February.

The 11 Indian team members were warmly welcomed by 14 wide-eyed, smiling patients who were

presented with Indian caps and basketball guides.

In the accompanying photo, (l to r) junior Mark Rucinski and seniors Paul Kardish and Dan Feruck visit with five-year old Jessica Scott of Petersburg.

place team-finish at the Juniata Invitational.

At the MAC tournament, Sloan proved the handicappers correct by finishing in his pre-tournament seeded sixth place.

"We're really going to miss Dave next season," Berrier said. "Not only did he close his career as one

of Juniata's top wrestlers but his leadership qualities will be tough to duplicate.

"The future looks good for 84-85 with only three wrestlers graduating from this year's squad. We have to bolster our heavier weights but we have some real good prospects. I'm optimistic," Berrier concluded.

## Center Plans Exhibited

The architectural plans for Juniata's new Kennedy Sports + Recreation Center were selected by the American Association of School Administrators (AASA) for display at their annual convention, Feb. 24-27 in Las Vegas.

The Altoona firm of Hayes, Large, Suckling and Fruth, architects of the Kennedy Sports + Recreation Center, submitted the plans to the AASA jury which in turn selected the project for the prestigious exhibit.

According to architect Thomas C. Large, the AASA jury selects only a small percentage of the projects submitted by architectural firms from throughout the United States. "The projects selected for this exhibit represent the state of the art in architecture," Large said.

"It is indeed an honor to have the Kennedy Sports + Recreation Center project selected for this exhibit," President Frederick M. Binder said. "We are all very proud of the

*Team leaders Tracey DeBlase (left) and Peggy Evans flank Juniata President Frederick M. Binder following the February 15 volleyball recognition dinner. Team members and Dr. Binder received sweatshirts as mementos of their 1983 MAC championship year.*

structure and are pleased that it has received the national recognition it so richly deserves."

Ground was broken for the Kennedy Sports + Recreation Center in July, 1981, and the building was

completed in January, 1983 at a cost of \$4.5 million. The official dedication ceremony was held on Juniata's Founders Day, April 17, 1983.

## Juniata College Alumni Council Activities

The Juniata College Alumni Council took the occasion of their Feb. 18 meeting to nominate 12 candidates for positions on the council, two alumni representatives to the Board of Trustees, and two current members for vice president of the council. The council also selected the honorees for its annual alumni achievement and alumni service awards, which will not be announced until the Reunion Weekend ceremonies on June 2.

The 12 Alumni Council candidates approved at the meeting will vie for six positions, with the three-year terms running from 1984 through 1987. The new council members will be selected by a vote of the alumni body and announced at the final Alumni Council Meeting

of the year later this spring. The candidates are:

James A. Ake '59, director of computer services, H.R.B. Singer Co., State College, Pa.

Kathie (Wareham) Bennett, M.D. '74, emergency room physician at the Harrisburg General Hospital.

Patsy J. Bruno, M.D. '66, pediatrician and chief of staff, Sunbury Community Hospital, Sunbury, Pa.

Daniel B. Hoover '70, asst. general manager of the Roaring Spring (Pa.) Blank Book Company.

Charles F. Mullen '57, executive vice president, Grieshaber and Co., Fairless Hills, Pa.

David L. Newcomer, M.D. '69, surgeon, surgical private practice, Lancaster, Pa.

Bruce R. Erb '76, vice president and investment manager, Hollidaysburg Trust Co., Hollidaysburg, Pa.

Linda (Wachsmuth) McKonly '73, homemaker and civic leader, Hanover, Pa.

Jane (Kuykendall) Sachs '69, sr. compliance officer, Wage and Hour Division, U.S. Department of Labor, Rochester, N.Y.

Mary Margaret White '73, director of planning and marketing research at the Rose Medical Center in Denver, Colo.

Aliceann Wohlbruck '58, executive director of the National Association of Development Organizations in Washington, D.C.

George M. Zlupko, M.D. '68, director of respiratory therapy at Altoona Hospital in Altoona, Pa. and J.C. Blair Memorial Hospital, Huntingdon, Pa.

The Alumni Council also nominated Betty Simpson '49 and Dr. Barry B. Moore '63 for a position as an alumni representative to the college's Board of Trustees. Simpson, a former vice president and member of the Alumni Council, is a former teacher at the Tyrone (Pa.) High School. Moore is a neurosurgeon in Harrisburg at General, Polyclinic and Holy Spirit hospitals. The three-year term runs from 1984-1987.

The council approved the nominations of two current members, William H. Chew '64 and Thomas N. Rupert, Jr. '63, for vice president of the Alumni Council. A resident of Devon, Pa., near Philadelphia, Chew is a staff engineer for the Aerospace Systems Engineering Division of General Electric. Rupert resides in Bethlehem, Pa. and is a manager of the Planning and Control Services and Information Service Department of Bethlehem Steel. The term is for one year.

In addition to the nominations and awards committees, the career planning and placement committee of the Alumni Council met to review the successful launching of

the Externship Program and plans for the Career Fair on April 11. The Externship Program, which pairs students with particular career interests and alumni in those fields for two or three days of on-the-job exposure over spring break, got off to a good start with nine placements (see inset). Working in conjunction with the Career Planning and Placement Office, the committee is also recruiting alumni in various professional fields for this year's Career Fair on April 11, when Juniata students will have the opportunity to attend presentations by alumni from many career areas.

The admissions committee of the council heard an encouraging report from Admissions Counselor and Alumni Volunteer Coordinator Nancy K. Law '81 that inquiries applications, and the all-important deposits are all running ahead of the same period a year ago. The committee is working on lining up alumni volunteers for three main areas of student recruitment activity:

*College nights and fairs*, held regionally in September, October and November, require alumni volunteers to meet prospective students and provide information on the college.

*Area/home receptions*, held from December through March, are attended by alumni volunteers and prospective students from the same regional area. Area receptions are large gatherings of prospective students who have made inquiries to Juniata and are meant to elicit applications; home receptions are smaller groups involving prospective students who have already applied to Juniata and are meant to encourage commitments. In both cases, alumni volunteers are needed to help coordinate arrangements and meet with prospective students.

*The phone call and home visit program* was instituted recently by the Admissions Office as a means of encouraging scholarship candidates to enroll at Juniata through one-to-one contact of an alumnus with the

prospective student. The program is an innovative effort to maintain and build on Juniata's strong academic reputation by attracting outstanding young scholars.

#### EXTERNSHIP PROGRAM LEADS OFF WITH NINE PAIRINGS

Winter break is usually a respite from the books for most students, who head for home and a week's rest before heading into the "stretch run" of spring term. Winter break this year was a little different, however, for nine Juniata students who participated in the new Externship Program of the Career Planning and Placement Office and the Alumni Relations Office. The students spent two or three days of their break getting some firsthand career exposure by accompanying Juniata alumni on-the-job. The pairings went like this:

Michelle M. Bartol, a senior marketing major from Shamokin, Pa., paired with Olive Odiorne (referred by Deborah Grigson '80), personnel supervisor at Strawbridge & Clothier in Exton, Pa.

T. Glen Boudier, a junior pre-medical major from Bethlehem, Pa., was with Dr. Robert S. McGregor '77, a pediatrician at Children's Hospital in Pittsburgh.

Theresa A. Sagan, a senior majoring in computer science and business from Wharton, N.J., matched up with James M. Biello '68, executive vice president at Chase Manhattan Bank in New York.

Peter J. Werts, a senior in banking from Pittsburgh, paired off with John M. Daniel (referred by Elmer Grant, Board of Trustees), employment manager at Mellon Bank in Pittsburgh.

John R. Lindroth, a senior majoring in computer science and biology from Stroudsburg, Pa., was joined with Dr. John R.E. Hoover '47, associate director of chemistry at Smith/Kline & French in Philadelphia.

Thomas C. Weiner, a junior in

pre-medical studies from Pittsburgh, spent a few days with Dr. Bernard I. Cohen '57, a plastic surgeon in Pittsburgh.

Mark T. Gruosso, a junior biology and chemistry major from Pittston, was sponsored by Dr. Carol Whitfield '61, assistant professor of physiology at the Milton Hershey Medical Center in Hershey.

Barbara M. Huber, a senior in marketing and personnel management from Huntingdon Valley, Pa., was paired with James M. Clemens, Jr. (referred by James S. Clemens, Sr., Board of Trustees), vice president of store development, Clemens Markets in Lansdale, Pa.

Henry F. Coyne, a senior in pre-law and secondary education from Camp Hill, Pa., spent his externship with Carl G. Wass, Esq. '59 in the law firm of Caldwell, Clouser & Kearns in Harrisburg.

## Dr. Hahn Prize Recipient

Dr. Erwin L. Hahn '43, professor of physics at the University of California at Berkeley, has been named co-winner of the \$100,000 Wolf Foundation Prize in Physics for 1983-84.

Hahn's discovery of nuclear "spin echoes" has made possible the efficient use of nuclear magnetic resonance as a powerful, noninvasive body imaging technique in medicine and a vital analytical tool in chemistry.

Hahn was cited by the Wolf Foundation, both for this finding and the discovery of the phenomenon of self-induced transparency in laser optics.

The Wolf Prizes, presented each year in Israel since 1978, honor achievement in agriculture, chemistry, mathematics, physics, medicine and the arts. Five of the past awardees have since received Nobel Prizes.

The winners will receive the prizes from Israel President Chaim

Herzog in a ceremony this May at the Knesset (Israeli Parliament) in Jerusalem.

In his work, Hahn discovered that by applying radio waves in pulses rather than continuously, the nuclei emitted delayed radio signals by themselves, very much like radar echoes.

He showed that these nuclear spin echoes were caused by the nuclei resuming gyrations in phase with each other in response to the second and subsequent pulses.

Hahn's pulsed technique is far more amenable to use of computers in nuclear magnetic resonance analysis than is the continuous wave technique. It has allowed for rapid and accurate images in medicine, a more versatile and less invasive technique than the x-ray scans.

The technique is widely used in laboratory chemical analysis as well.

Some 20 years after his spin echo discovery, Hahn and S.L. McCall discovered "self-induced transparency" whereby energy from a strong laser pulse enters a crystal, is stored briefly, and then continues in the original direction of the pulse. As a result, an opaque substance briefly becomes transparent. The unusual finding is considered the first atomic demonstration of a phenomenon known as the soliton — an interchange or sharing of energy involving cooperation of many particles.

Among his many honors, Hahn has been elected to both the National Academy of Sciences and the American Academy of Arts and Sciences.

A native of Sharon, Hahn earned his B.S. degree in chemistry at Juniata and obtained a Ph.D. in physics from the University of Illinois. He has taught at Stanford University and served as a resident physicist at the Watson Laboratories of IBM before joining the Berkeley faculty in 1955.

Dr. Erwin L. Hahn '43

# CLASS NOTES

Item (attach additional sheet if necessary):

Juniata is always looking for news of its alumni: promotions, degrees, job changes, honors, marriages, births, etc. Even an address change. If you fit the bill — or would like to report on a friend — please complete this form and return it to the office of Alumni Affairs. We encourage you to send photos (black and white) with your news.

Name	Class	Spouse's Name	Class
Address	City	State	Zip

## 28

**Karl A. Hoffman** has retired and is residing at 28 N. Sixth St., Shamokin, Pa.

**Russell Stambaugh** celebrated his 90th birthday on March 2. He is residing in Buffalo, N.Y.

## 32

**Ralph C. and Mary Replogle Over '34-'32** celebrated their 50th wedding anniversary.

## 33

**Fay T. and Hazel Clemence Axtell '35-'33** celebrated their 50th wedding anniversary on Jan. 27, 1984. Their two daughters and many friends were in attendance.

## 34

**50th Reunion:**  
June 1-3, 1984

## 37

**Dr. John S. McCartney** has retired and is residing at 9 Granran Dr., Corning, N.Y.

## 38

**The Rev. John R. Sanderson** has retired and is residing at 660 Capri Blvd., Treasure Island, Fla.

## 39

**45th Reunion:**  
June 1-3, 1984

## 40

**Doris E. Caldwell** has retired from the Christian Family Service Center in Hong Kong and now resides at Room 1133, Program Agency, Presbyterian Church (USA), 475 Riverside Dr., New York, N.Y. 10155.

1979 and resides at 2647 A St., LaVerne, Calif.

## 42

**John O. Gehrett** of Franklin Lakes, N.J., has been promoted to chief operating officer for Potters Industries, Inc.

### Philadelphia Alumni Club

On Feb. 27, Juniata alumni, parents and students gathered at the New Goshenhoppen Reformed Church, East Greenville, Pa. for a buffet dinner prior to the Concert Choir performance.

**Willis A. Cruse** has retired after 29 years with the L.B. Williams Company, Inc. and currently resides at 29 Newman Rd., Kendall Park, N.J.

**W. George Reigner** has retired as assistant principal of Chester High School. He and his wife are spending time at Marco, Fla. (address: 454 Echo Circle) and also with their family in Brookhaven, Pa. and Tesheville, N.C.

**Dr. Charles S. Rowland** retired as vice president of research and development for Avon Products, Inc. on Jan. 1. He plans to remain a part-time consultant and is looking forward to a golfing expedition in Scotland.

## 44

**40th Reunion:**  
June 1-3, 1984

**Florence (Crowell) Simons** and her husband have been Church of the Brethren Foreign Mission Society Missionaries the last 36 years in China and the Philippines. Future plans include a three-week tour of mainland China and retirement this year.

## 46

**Bernard A. Cohenour** has retired after 37 years of teaching. He resides in Mount Union, Pa.

## 41

**Mary N. Dadisman** has been retired since

**Dr. Richard H. Quinn** is the new assistant to the president of Nebraska Wesleyan University. He resides in Lincoln, Neb.

# 61

**Dr. Andrew Horvath** is a pathologist at the Presbyterian Hospital of Albuquerque, N.M.

**Dr. Lawrence S. Johnson** is working in radiology at the Presbyterian Hospital of Albuquerque, N.M.

**Dr. Alan S. King** is working in cardiology at the Presbyterian Hospital of Albuquerque, N.M.

medical education at Michigan State University.

**Gary R. Rowe** of Downers Grove, Ill., has been appointed senior producer of WIBS' "NICE PEOPLE."

## 68

**James M. Biello** of New Providence, N.J., has been promoted to vice president and executive of technical services global petroleum of Chase Manhattan Bank, New York.

**Janet (Seiner) Hooper** is an engineer/project manager in electronics and acoustics for the U.S. government. She resides at Chesapeake Beach, Md.

## 69

**15th Reunion:  
June 1-3, 1984**

**R. Clifford Berg, Jr.** of Wilmington, Del., has established his own financial planning firm called, "The Financial Dynamics Group."

**Charles E. Sackett** has been promoted to vice president of investments at Advest, Inc. He resides at Elba, N.Y.

## 70

**Dr. Susan R. Stapleton** has received her Ph.D. in chemistry from Miami University in Oxford, Ohio. Currently involved in postdoctoral research at the University of Wisconsin, she resides in Madison, Wis.

**Dr. Robert M. Wood** of Lenoir, N.C., is practicing orthopedic surgery and sports medicine.

## 71

**Dr. Carol S. Diehl** of Fairbanks, Alaska, is assistant professor of counseling at the Center for Health and Counseling of the University of Alaska-Fairbanks.

**Dr. Carol (Morningstar) Lamparter** of Huntingdon, Pa., is practicing medicine at the Mount Union Medical Center.

**Dr. James L. Madara** of Lexington, Mass., is assistant professor of pathology at Harvard Medical School. He received the American Gastroenterological Association/Ross Research Scholar Award in December, 1983.

**Daniel M. Sell** is personnel manager for the Berlin plant of Owens-Corning Fiberglas. He resides in Berlin, N.J.

## 72

**Pamela (Hurd) Knief** of Hummelstown, Pa., is a program specialist with the Pennsylvania Department of Public Welfare. She has also received her M.S. in government administration from the University of Pennsylvania.

## 73

**Gwen (Smith) Pote** of Washington, D.C., is a reliability engineer with Litton Industries.

**Thomas Rinaldi** of Doraville, Ga., is an agent for electrical products with Fox, Rowden and McBrayer.

**Vincent M. Yaniga** is assistant director of a satellite office for the Scioto Paint Valley Mental Health Center and has received the Employee of the Year Award for 1983.

## 74

**10th Reunion:  
June 1-3, 1984**

**J. Clifford Elder** of Philadelphia, Pa., is director of the performance analysis division of the U.S. Navy Publications and Forms Center in Philadelphia.

**Debra (Frazier) Peterson** of Huntingdon, Pa., has been recognized as an *Outstanding Young Woman of America*.

**Frank L. Pote, III** of Washington, D.C., is a captain in the U.S. Marine Corps.

**Dr. Walter C. Prozialeck** of Philadelphia, Pa., has received a research grant from the National Institute of Mental Health for his work with the biochemical effects of drugs used in the treatment of severe mental illness. Dr. Prozialeck also serves as assistant professor of pharmacology at the Philadelphia College of Osteopathic Medicine.

## 75

Karen Miller and **Dr. Eric C. Jensen '77**, April 16, 1983, Indianapolis, Ind.

Cindy Chuderewicz and **Dr. Richard L. Barnes '78**, Jacksonville, N.C.

Barbara E. Knaub and **Mark R. Henry '76**, December 10, 1983, York, Pa.

Glenda Flansburg and **Thomas W. Phillips '78**, August 20, 1983, Syracuse, N.Y.

Debra Jean Anderson and **Frederic Joseph Ammerman, Esq. '79**, Clearfield, Pa.

Karen Stack and **Dr. Vincent G. Nardone '80**, Randolph, N.J.

**Linda (Sevick) '82 and Robert C. Hendricks '82**, September 24, 1983, Huntingdon, Pa.

**Mindy Truesdale '82 and Robert E. McDonald '83**, September 10, 1983, Harrisburg, Pa.

Katherine Elizabeth, born to **Margaret (Bell) and Daniel M. Sell '71-'71**, September 16, 1983.

Jonathan Isaac, born to **Ginette (Isenberg '72)** and Peter Cluck, August 26, 1983.

Jonathan Rhodes, born to Cynthia and **Steven W. Glass '72**, January 6, 1984.

Drew Thomas, born to Jane and **Craig N. Nishiyama '72**, November 15, 1983.

Ashleigh Clare, born to Carol and **William C. Bowers, Jr. '73**, June 15, 1983.

Charles William, born to **Jane (Hardcastle) and Johnson G. Coyle '73-'73**, May 1, 1983.

Christopher, born to **Anne (Pum) and Thomas Rinaldi '73-'73**, September 1, 1983.

Graham and Brendan, born to **Dianne (Neal) and Thomas A. Loper '75-'73**, January 13, 1984.

Emily Ruth, born to Karen and **Fred C. Mason, Jr. '73**, November 22, 1983.

Michael Kenji, born to Carol and **C. Scott Nagao '73**, September 28, 1983.

Timothy Ryan, born to **Gwen (Smith) and Frank L. Pote, III '73-'74**, January 15, 1984.

Kecia Marie, born to **Cynthia (Sprenkle '73)** and Anthony Santoro, August 16, 1983.

Emily Ann, born to Robin and **David W. Hoffman '74**, December 25, 1983.

Terence David, born to **Catharine (Gross) and Matthew K. Musho '74-'74**, September 8, 1983.

Scott A., born to **Ellen (Norton '74)** and Scott A. Noerr, July 9, 1982.

Nicholas Kostandino, born to **Frances (Vitabile '74)** and Dean Arniotes, January 30, 1984.

Erin Elizabeth, born to **Jayne (Keirn '75)** and Paul R. Donahue, December 20, 1983.

Lena Diane and Emily Rose, born to **Nancy (Jacobs) and Jay E. Endres '75-'75**, March 7, 1983.

Sarah Elizabeth, born to Joan and **David S. Hoover, '75**, August 2, 1983.

Erin Lin, born to **Joy (Fickes '75)** and Dennis Lebo, August 26, 1983.

Jeremy Walker, born to **Sharon (Donald '75)** and Russell J. Simmons, Jr., February 21, 1983.

Maxwell Shane, born to **Margery (Herr) and Lawrence R. Stem '75-'75**, October 31, 1983.

Timothy Neil, born to **Lisa (Frosell '78)** and Neil Brierly, May 1, 1983.

Amy Nicole, born to **Rebecca (Finkle) and Charles J. Koren '78-'78**, October 30, 1983.

Whitney Bantz, born to **Kathleen (Bantz '70)** and David Ashworth, December 2, 1983.

Lauren Michele, born to **Donna (Roys) and Matthew E. Blauch '82-'79**, November 16, 1983.

Melissa Ann, born to **Carolyn (Anderson) and John W. Gardner '70-'80**, September 20, 1983.

Lindsay Hope, born to **Gwendolyn (Simons '79)** and Thomas Morris, January 29, 1984.

Robert Andrew, born to **Amanda (Slawson '79)** and Joseph Passarelli, October 7, 1983.

Stephanie Leigh, born to **Wendy (Wunsch) and Jon F. Schneider '80-'79**, January 6, 1984.

John Allen, IV, born to **Lisa (Barbot '81)** and John A. Vancil, III, October 28, 1983.

## BIRTHS

Benjamin Noel, born to **Shirley (Houchin) and Robert Hunter '70-'73**, July 27, 1983.

John Bradley, born to Joan and **John W. Schreiber '70**, November 10, 1983.

Kurtis Nolan, born to **Shirley (Strock) and Jeffrey Albright '71-'72**, December 8, 1983.

Christopher William, born to **Linda (Golightly '71)** and John Estella, May 25, 1983.

Jeffrey Karl, born to **Ann (Witt) and Douglas R. Laird '71-'71**, October 6, 1983.

Matthew Philip, born to **Carol (Morningstar '71)** and John Lamparter, September 20, 1983.

# Literary Great Remembered

By Frederick M. Binder

One of the great literary figures of our time passed away on Feb. 23. Jessamyn West was in her 82nd year when she died. She had lived a full and complete life. Her novels and poetry attest to that and will serve as her memorial for generations. For me, her death was a personal loss. I had admired her work for many years, but in 1970, I was privileged to meet her and later to become associated with her when she served as a trustee of Whittier College, her alma mater. One learned to respect her wisdom and admire her way with words. She had great wit, too. Not the sharp, biting wit of some intellectuals, but the quick glint of humor seen first in her eyes (even before the words came out) had a way of gently speaking to you.

And it was with words that Jessamyn dealt. As a novelist and a poet for over four decades, her words were put into print. As a writer-in-residence at Mills College and Wellesley College and Whittier, she influenced students to respect and use words effectively. She delighted in conducting writers conferences and did so across the country at such prominent universities as Stanford, Indiana, Notre Dame and Kentucky where, again, she dealt in words and transmitted her skill and artistry to the young and aspiring writers attending these seminars.

When she came to Juniata in the spring of 1981 to deliver the commencement address, the title of her speech was "Sharing Your Being With Others — Through Words." In that speech, she told the graduates and all of us assembled that, "As human beings, we have the opportunity, through the responsible use of words, to convey to others not only our own version of the unique world in which each

of us lives — alone — but to convey to others the only true treasure each of us possesses; that is, our unique selves."

The speech, she said, was an invitation and a call in the words of Martin Buber, "to make the effort to impart oneself to others as one is," and not to use words to hide one's identity. She said:

"Sham words make life shoddy.  
Graceless words make life awkward.

Evil words . . . make life hell."

Imparting oneself as one is to others, through the proper and intelligent use of words, Jessamyn West said, prevents us from becoming faceless, mass-men. The gift of language sets us apart as human beings, and language should be treated as "a holy instrument to be used to see the reality and hence the wonder of the world."

In her lifetime, Jessamyn West published 18 novels and several books of poetry. Some of the titles are *The Witch Diggers*, *The Secret Look*, *Cress Delehanty*, *Massacre at Fall*

*Creek* and *The Life I Really Lived*. Her short stories are found in many prominent national magazines. Her first and best-known work was *The Friendly Persuasion*, a series of sketches about 19th Century Indiana farmers molded after her own Quaker ancestry. Published in 1943, it was made into a movie a decade later.

I have a copy of *The Friendly Persuasion* on my desk. On the fly leaf, in Jessamyn's hand, are these words:

"For thirty years this book has rested on my shelves. I planned it as a gift for someone. But until now the right person hadn't come along. You, Fred and Grace, are the right persons and I give it to you with love and admiration."

signed, Jessamyn

July 20, 1975

Aristotle asked, "What is a friend?" and answered, "A single soul dwelling in two bodies."

Jessamyn West, in giving of herself through words, always will dwell in the hearts and memories of each of us who loved her as a great human being and our friend.

The late Jessamyn West (second left), well-known author, delivered the Commencement Address at Juniata in 1982 and was awarded an honorary Doctor of Literature degree. Assisting President Frederick M. Binder with the degree presentation was Dr. Earl C. Kaylor, Jr., professor of history and faculty marshal (left) and Dr. Esther M. Doyle, professor of English, emerita.

## Reunion Weekend Set

Reunion Weekend (June 1-3) will provide a rare opportunity for the classes of 1934, 1939, 1949, 1954, 1959, 1964, 1969, 1974 and 1979, and the emeriti classes to get together and enjoy the company of old friends and classmates. The Alumni Office is planning a fun-filled weekend with educational workshops and demonstrations, an arts and crafts festival, physical fitness activities and reunion dinners.

The weekend will culminate with

the opportunity to take off on an alumni tour, a get-away trip to the Bahamas, June 4-8.

The base cost for the tour is \$297, and includes accommodations at the Bahamas Princess Hotel in Freeport, round-trip air fare from Baltimore or Philadelphia to Freeport, baggage handling, ground transportation, taxes and gratuities. A meal plan of \$28 per day, plus \$16.80 tax, is available; the plan includes breakfast and dinner daily.

## Dr. G. Edwin Brumbaugh Dies

Dr. G. Edwin Brumbaugh, nationally recognized authority in restoration and historic preservation, died Nov. 29 at his home in Gwynedd Valley. He was 93.

The son of the late Martin G. Brumbaugh, former Juniata president and governor of Pennsylvania, Dr. Brumbaugh built The Cloister at Juniata, and in 1974 was presented with an honorary Doctor of Humane Letters degree from the college.

Among the historic buildings Dr. Brumbaugh restored are the Ephrata Cloister, the Daniel Boone Homestead, Lafayette's Headquarters at Chadds Ford, the Old Ferry Inn at Washington's Crossing and the Golden Plough Tavern in York.

In 1982, Dr. Brumbaugh was presented with the prestigious National Trust for Historic Preservation Award honoring his outstanding achievements in architecture. The award was presented to Dr. Brumbaugh by First Lady Nancy Reagan.
